

The background image shows two hands holding a coconut shell. The hands are positioned in the center-right of the frame, with one hand at the top and the other at the bottom, holding the coconut. The coconut is light-colored and has a rough, textured surface. The hands are dark-skinned. The person holding the coconut is wearing a green beaded bracelet on their right wrist and a white string bracelet on their left wrist. The background is a blurred, dark green, suggesting a forest or jungle setting. The text is overlaid on the left side of the image.

Plan Kaogui Social 2025

Action 2025/ 2026

Guanamaque: Cacao, Community and
Autonomy.

Who are we?

Inline Nomad - Kaogui Social is a non-profit organization founded in 2019 that promotes social inclusion through educational, charitable, and environmental projects, in France and abroad.

Our lines of action:

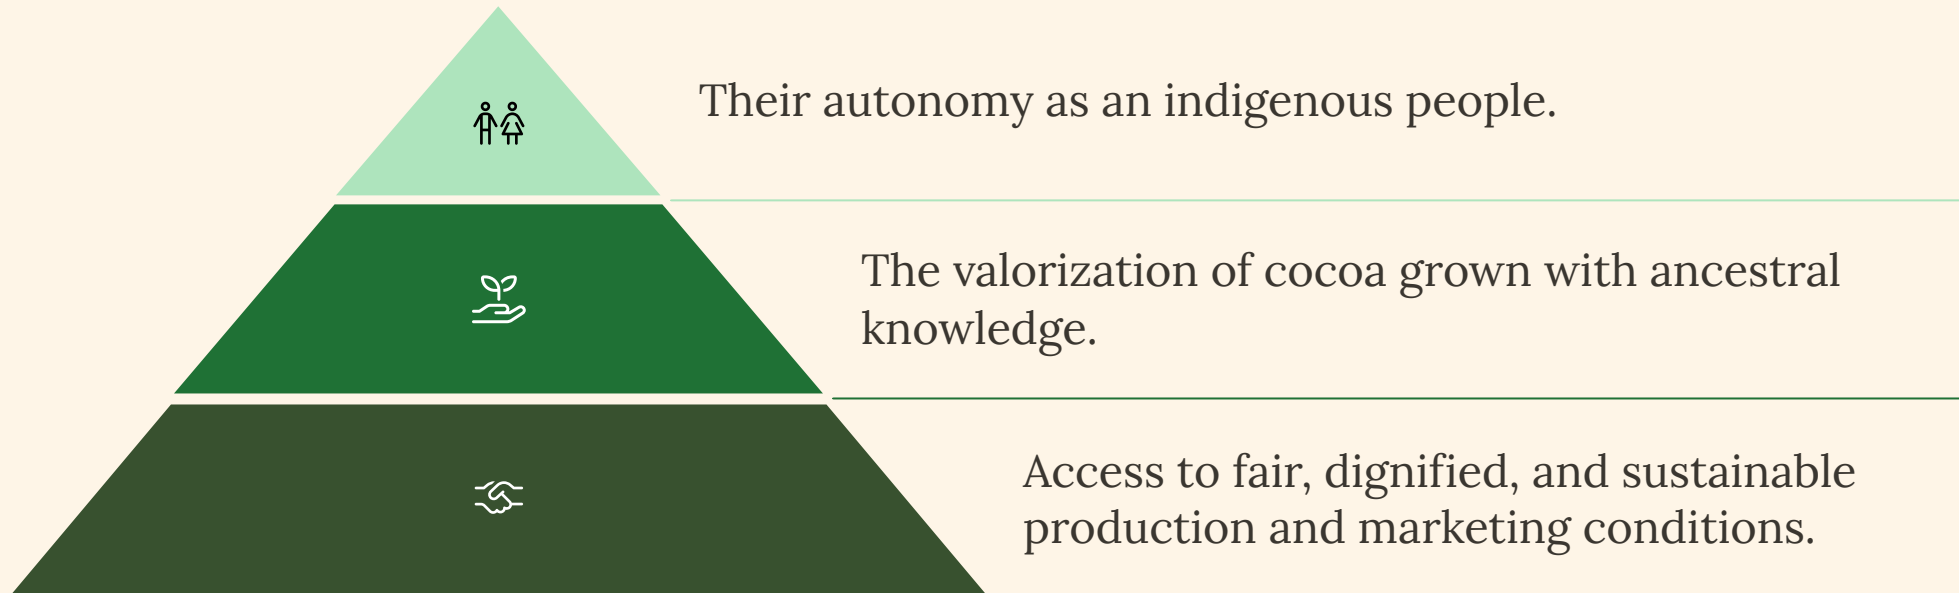

Social development projects: sport and community autonomy

Support programs for indigenous and rural communities.

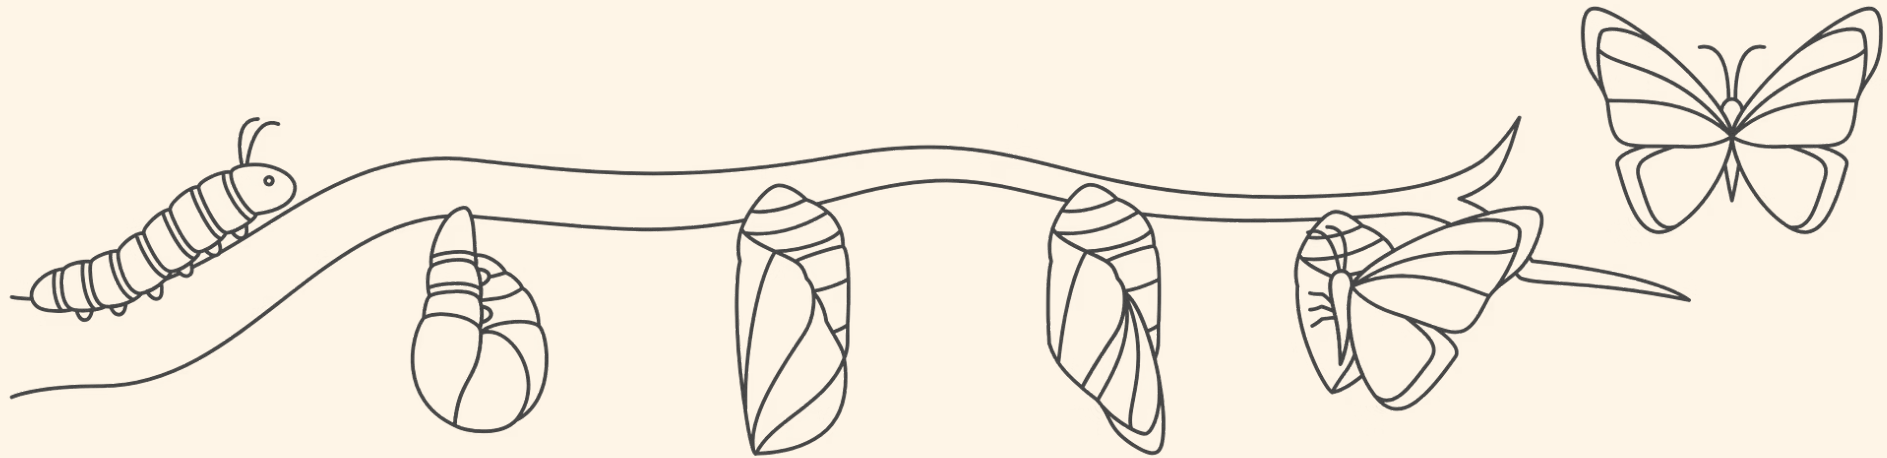

Volunteering and responsible social tourism.

Why Guanamaque?

In 2024, we launched a pilot project in the Kogui indigenous community of Guanamaque (Sierra Nevada de Santa Marta, Colombia) to promote:

Pilot results (2024–2025)

1. Métodos de baja calidad

Fermentación en sacos y secado en el suelo.

2. Construcción de la planta

Primera planta artesanal de transformación de cacao.

3. Colaboración comunitaria

Trabajo de 8 Voluntarios junto a la comunidad Kogui.

4. Beneficios directos

20 familias productoras beneficiadas.

5. Beneficios indirectos

Más de 50 familias beneficiadas.

6. Producción tradicional mejorada

6.000 kg de cacao seco transformados contra 360kg el año anterior.

Current challenge: more cocoa, capacity at its limit

Thanks to the success of the pilot, more Kogui families have joined the production. However, the current plant cannot cope.

Faced with the limitations, the community took the initiative:

- They divided the three original dryers into two, reusing the lids to create new units.
- They created a giant dryer that can handle a total of 700 kg.
- They are already creating two fermenters of 500 kg each.

This solution reflects the community's ingenuity and commitment, but also highlights the urgent need to expand and improve the plant to ensure quality, hygiene, and sustainability in the process.

Goals 2025–2026

1

Sustainable access to water

Implement a self-sustaining community hydraulic system (hydraulic ram technology) that guarantees water for the cocoa process, without relying on external energy or affecting the natural environment.

2

Support the planting of 8,000 additional cocoa trees

- Balanced among 16 producer farms covering a total area of 1,300 hectares.
- Equipping Kogui workers with shovels, machetes, and saws.
- Providing support with simple meals to encourage community minga days.

3

Community trade strengthening

- Training in negotiation, product presentation, and connecting with conscious buyers. Evaluation of certifications such as organic or fair trade.
- Promotion of community-led, direct and fair marketing.

4

Strengthening cultural immersion

- Through foreign volunteer programs
- Communicating about aspects of Kogui culture

Expected impact

More than 50 producer families directly benefited.

Strengthening indigenous autonomy and cultural immersion.

Cocoa processing with added value, quality and dignity.

Generation of fair and sustainable income.

Estimated budget 2025–2026

Conversion rate used: €1 = 4,700 COP

| N° | Budget Item | Amount (COP) | Amount (€ approx.) |
|-------|--|--------------|--------------------|
| 1 | Water system + reservoir (500 m of hose, intake, materials, mingas) | 22,250,000 | 4,734 € |
| 2 | Planting of 8,000 cacao trees (inputs, tools, transport, mingas) | 24,600,000 | 5,234 € |
| 3 | Volunteering missions (2 sessions) | 9,070,000 | 1,930 € |
| 4 | Creation of audiovisual content | 6,500,000 | 1,383 € |
| 5 | Repairs and adjustments | 1,800,000 | 383 € |
| 6 | Management, communication and contingencies | 4,000,000 | 851 € |
| 7 | Support for cacao commercial development | 4,300,000 | 915 € |
| TOTAL | — | 72,520,000 | 15,430 € |

How can you help?

- By making a financial donation.
- By sharing your technical or professional knowledge.
- Spread the word about this project.
- Joining as a field volunteer or providing remote support.
